#### RESPONSE TO AMENDMENT

1. Claims 1-70 and 77-90 remain for further examination and pending.

## The old rejection maintained

2. The rejection is respectfully maintained as set forth in the last Office Action mailed on April 14, 2005. The claim rejection of previous office action mailed on April 14, 2005 is incorporated herein by reference.

## Response to Arguments

- 3. Applicant's arguments with respect to claims 1-70 and 77-90 filed on July 18, 2005 have been fully considered but they are not deemed to be persuasive for the claims 1-70 and 77-90.
- 4. Applicant's arguments under 35 USC 112 first paragraph and under USC 112 second paragraph are not persuasive and rejection of claims 1-70 and 77-90 under 35 USC 112 first paragraph and under USC 112 second paragraph stands.
- 5. In the remarks, the applicant argues that:

j

Application/Control Number: 09/764,493

Art Unit: 2155

Argument: Keesey does not teach or suggest the claim 1 limitations "detecting, independent..."

Response: Keesey teaches the steps of: detecting, independent of any request for the data, that a second more recent version of the data is available (column 7 lines 25-30, Keesey discloses that a request for more recent versions of the document are requested from the origin server, new versions could be pushed downstream to any DSS that has previously requested the document independently of the user request and inquire processes discussed in figures 4-6); and in response to detecting, independent of any request for the data, that the second more recent version of the data is available, requesting the second more recent versions of the data be supplied to the cache, and storing in the cache the second more recent version of the data (column 7 lines 1-30, Kqesey discloses that a more recent version of the documents cached are requested and stored in the cache server, new versions could be pushed downstream to any DSS that has previously requested the document independently of the user request and inquiry processes discussed in figures 4-6).

In response to applicant's argument that Keesey does not teach or suggest the claim 1 limitations "detecting, independent... and in response to detecting, independent...", a recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim.

6. Applicant's arguments do not comply with 37 CFR 1.111(c) because they do not clearly point out the patentable novelty which he or she thinks the claims present in view of the state of the art disclosed by the references cited or the objections made. Further, they do not show how the amendments avoid such references or objections.

7. Accordingly, THIS ACTION IS MADE FINAL. See M.P.E.P. § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 C.F.R. § 1.136(a). A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
